PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Python, Excel, and Power BI with hands-on experience in building dashboards, performing EDA, and generating actionable business insights. Proven ability to reduce reporting time and support data-driven decision-making through real-world projects and internship experience.

TECHNICAL SKILLS

Tools: Excel, SQL, Python

Data Visualization: Power BI, Tableau

Data Analytics: Data Cleaning, Data modeling, EDA, Data Interpretation.

PROFESSIONAL EXPERIENCE

Data Analyst Intern – Edure, Trivandrum September 2025 – Present

- Streamlined data cleaning processes using SQL, reducing manual reporting time by 25%.
- Developed interactive Power BI dashboards to track revenue growth, driving data-informed decisions.
- Collaborated with cross-functional teams to provide actionable insights.

VIRTUAL EXPERIENCE

Gen AI Powered Data Analytics Job Simulation – Forage & TATA April 2026

- Performed EDA on customer financial data to identify key risk patterns and drivers of credit delinquency.
- Developed an AI-driven predictive framework to identify high-risk accounts and enable proactive credit management.

Data Visualization & Business Insights – Forage & TATA January 2026

- Developed interactive dashboards to visualize complex KPIs, uncovering actionable business trends.
- Translated raw data into clear, data-driven narratives to support stakeholder decision-making.
- Applied effective data storytelling principles to optimize reporting workflows.

PROJECTS

Maven Market Analytics Report – Excel, Power BI March 2026

- Developed interactive Power BI dashboards using DAX measures to analyze sales, revenue, and inventory trends.
- Engineered robust data models to streamline data relationships and optimize reporting performance.
- Implemented Row-Level Security (RLS) to manage user access and ensure secure, role-based data visualization.

Pricing Sensitivity & Retention Analysis – SQL, Power BI November 2025

- Identified a 10–15% price sensitivity threshold to optimize revenue while maintaining a less than 5% churn risk.
- Recommended a segmented pricing framework for distinct user groups, supported by continuous performance monitoring.

Customer Behavior & Subscription Analysis - Python October 2026

- Conducted end-to-end EDA on banking datasets using Python (Pandas, NumPy) to analyze demographics and transaction trends.
- Visualized key insights, including spending patterns and churn risk, using Matplotlib and Seaborn to guide decisions.

EDUCATION

Bachelor of Commerce

Manonmaniam Sundaranar University, Tamil Nadu

August 2019 – April 2022
